DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nagasawa.

Nagasawa discloses retarding spark timing when a predetermined speed is reached to prevent engine overspeed. No mechanical governor is used.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4/1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nagasawa in view of Ishikawa et al. Nagasawa does not use digital control of spark timing. Ishikawa et al teaches using a digital system to control ignition timing of an engine. It would have been obvious to one with ordinary skill in the art at the time the invention was made to modify Nagasawa to use a digital controller to adjust ignition timing, as taught by Ishikawa et al, to increase adjustment speed and accuracy.

Allowable Subject Matter

Art Unit: 3747

Claims 2, 3, 4/2 and 4/3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Information Disclosure Statement

The International Search Report listed in the IDS filed June 1, 2006 has been considered.

The Translation listed in the IDS filed October 2, 2006 has been considered.

The Office Action listed in the IDS filed February 27, 2007 has been considered.

Conclusion

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The ignition timing control systems made of record and not relied upon are considered pertinent to applicant's disclosure.
